Weather Probabilities.
WASHINGTON, November 26th.—For Pacific coast region: Fair weather.

THE HOLIDAY NUMBER.

In accordance with its annual custom, the *Broncos* Holiday number will appear on the 1st day of January, 1883. It will be a sheet of unusual size. It will contain a number of articles prepared especially for it by writers of the highest ability and broad reputation as scholars and advanced thinkers. These will be topics of profound interest. In addition to the statistics of the wealth and production of the State, the financial condition of the Commonwealth, the record of births, deaths and marriages for 1882, local statistics, the news current, choice miscellany, market reports, and special articles of the highest interest and value to the reader. All the usual features of the popular magazine will be present. The *Broncos* *Number* will be found to possess a special quality as a paper to be sent abroad, as representative of this city and the State, and will form the very best medium for business announcements, as it will have an unprecedentedly large circulation. Special arrangements are being made to give that widest distribution ever given any similar publication. Business announcements as to the specific character and great value of the paper will be made hereafter, and in time to enable orders for extra copies to be filled.

CHRISTMAS STORY.

In the Christmas number of the *Broncos* there will appear a Christmas story, written for this journal by one of the most talented and popular of European novelists. It will be complete in that number, and will probably occupy between fourteen and fifteen columns. It will be found to be a deeply interesting romance, strong in character sketches, powerful in its descriptive phases, and to have a plot most natural and of thrilling interest. It will in all respects be the leading and most attractive Christmas story published in any news journal of the country.

THIS MORNING'S NEWS.

New York Stock Exchange.—Bonds were quoted at 1183 for 1867; 112 for 1872; 103½ or 54½; sterling \$4,800; silver bars, 111½.

Silver in London, 51½; consols, 102; 5 per cent. United States bonds, extended, 104; 4½; 12½; 4½.

In San Francisco half dollars are quoted at 4½ cents to par; Mexican dollars, 88½ cents.

Miners' stocks were generally quiet in San Francisco yesterday. Prices showed little change from Friday.

Several Government officials have been dismissed by the President, on account of their sympathy with the star route swindlers.

A strange lady died at Omaha Saturday, leaving no clue to her identification.

One man was killed and several seriously hurt at New Haven, Pa., by explosion of dynamite.

A gang of three were convicted and sentenced at Carlyle, Ill., Saturday.

Fire at Lancaster, Pa.; also at New York.

A mysterious shooting scrape occurred in Washington Saturday night, in which one man was fatally wounded.

Thurlow Weed's remains were interred at Albany, N. Y., Saturday.

Mrs. Soville has been granted a new trial at Chico.

The trial of Frank James, the Missouri bandit, begins at Kansas City, to-day.

In a railroad accident near Newcastle, N. B., Saturday, three men were badly wounded—one fatally.

The French steamer *Antarctic* has been wrecked at Carley, N. Y., Saturday.

Bishop Annesley, in attempting to quell a riot at Huanto, Peru, was shot.

Fences had a detective at Dublin Saturday night, and wounded another.

Floods are doing great damage in Germany.

Spain has been annexed by the Sultan of Mozu to the port cities of the ports of Santa Cruz, Palermo and Pompeii.

The Albert Mills at Dusseldorf, Eng., have been destroyed by fire.

Dervish Pasha has been declared not guilty of encouraging Arabi.

There is an alarming increase of epidemic disease at St. Petersburg, especially diphtheria.

At Warrington, Eng., Saturday, caused a loss of half a million dollars.

The Canadian authorities have fallen the Fullam Car Company \$15,000 for violating the customs laws.

An ex-President of a Buffalo (N. Y.) bank is on trial for embezzlement \$200,000.

The second trial of Clarence Gray at Redwood City for the murder of Theodore Glancey resulted in a verdict of acquittal.

At Stockton, Saturday, William White, an engineer, was shockingly injured by his train.

A desperate fight with a lunatic took place at Portland, Or., Friday, in which several persons were wounded.

A Chinaman was beaten to death with a club at the Chinese temple county Friday evening, by a young man named Grant.

Louis Mobsach shot and dangerously wounded his neighbor, another Frenchman, in Conn Valley, Napa County, yesterday.

A riot occurred at Fayetteville, N. C., Saturday night, in which over thirty men were hurt—two fatal.

A party of missionaries for China leave Omaha to-day on their way west.

The dead body of an unknown man was found near Pendleton, Or., yesterday.

The foundry of Bonney, Duffy & Co., at Quincy, Ill., was burned Saturday night, causing a loss of \$15,000.

A small storm prevailed throughout New York.

Thomas L. Tullie has been appointed Postmaster at Washington, vice D. R. Ainger, removed.

An express train was ditched yesterday near Hornerville, N. Y., and the firemen killed.

The upper four page this morning will be found Saturday's Eastern and foreign dispatches to the Record-Union.

The *Record-Union* Review says: "The United States might well be excused for not paying more attention to the conduct of its debts with neophytes. Geographically they are so distant from Europe that they may regard themselves as safe from aggression, and therefore exempt from the necessity of keeping up great armaments. Moreover, the growth of population and wealth is so rapid that in a generation or so they could reasonably reckon upon the debt becoming relatively so light as to no longer be a matter of serious concern."

Now that the daymen of the State are up in arms against oligomaniacs, and are met on the 12th of December in convention to take counsel together as to the conduct of the war, they might begin the work of plucking beans from their own eyes in the matter of short weight butter. If they do not mean the evil in that respect, the conundrum probably will.

It is said that in the most recent editions of leading newspapers there are between 4,000 and 5,000 new words. The rapidity with which new words and new definitions come to the front, and the rapidness with which they are adopted into the English language, is one of the curiosities of this age.

The Stockton Herald (Democratic) admits that the next Presidential campaign will be fought out on issues which have as yet been but little discussed upon this coast.

The question of building a new Court-house is to be submitted to the vote of the people in San Joaquin county.

A SHAMEFUL DEATL OF JUSTICE.

The acquittal of Clarence Gray, adds one more infamy to the long list of outrages upon justice which have been perpetrated by California juries in capital cases. The murder of Glancey was a cowardly and deliberate assassination, and it was a crime committed in revenge for the faithful performance of his duty to the community by a courageous and conscientious journalist. No jury could have brought in a verdict of acquittal in this case without violating its oath, and without ignoring the plain facts of the homicide. The assassin was a man who will squint the men who declared him innocent of the blood of his victim? This case, however, disgraceful and revolting as it is, does not, unfortunately, stand alone. The "law's delays" in this State, have for years been a cause of infinite mischief and injury to the public welfare, and the plan followed has actually become a recognized part of every criminal lawyer's equipment. When a particularly factitious attorney is committed, and public opinion is for once tilted to the pitch of danger, the first step taken is to procure delay in the trial of the case. In fact all it does is to separate the residence property well separated from adjoining buildings. And petroleum is not dangerous if properly stored; certainly not nearly so dangerous as grain and planing mills, for example. What is required is proper regulation and supervision of the storage. Our merchants cannot carry on this branch of their business if they are compelled to store their oil outside the city limits. Such a requirement would oblige them to relinquish that department of their trade altogether. But the Board of Underwriters and the Fire Commissioners, representing the two most experienced interests, could be invited to meet and draw up regulations for the storage of coal oil, and the Trustees could enforce these regulations. One other way would be to constitute the Fire Commissioners (including the Chief of the Fire Department) and the Board of Underwriters a Board with special authority to see to the storage of petroleum; but there might be a constitutional objection to this latter method, and all such difficulties would be overcome by the first one suggested. Of course all that is required is the safety of the community. If that can be obtained without inflicting injury upon business, this is the way to take. The ordinances there are occasionally, but with rare exceptions they are confined to friendless criminals or to foreigners. It is possible to convict a Chinaman or a Mexican of murder, but it will have an unprecedently large circulation. Special arrangements are being made to give that widest distribution ever given any similar publication. Business announcements as to the specific character and great value of the paper will be made hereafter, and in time to enable orders for extra copies to be filled.

THE UNIVERSITY AND THE HIGH SCHOOLS.

The *Argonaut*, if we understand it, appears to be opposed to the completion of the State educational scheme by the incorporation of High Schools with it, on the ground that the State ought not to provide anything but the rudiments of education. Mr. Pixley, if we understand him, would be the first to place the University and the lower schools under the same roof. The two most experienced interests, the Board of Underwriters and the Fire Commissioners, could be invited to meet and draw up regulations for the storage of coal oil, and the Trustees could enforce these regulations. One other way would be to constitute the Fire Commissioners (including the Chief of the Fire Department) and the Board of Underwriters a Board with special authority to see to the storage of petroleum; but there might be a constitutional objection to this latter method, and all such difficulties would be overcome by the first one suggested.
